Technical Report DSIC-II/13/03,
http://www.dsic.upv.es
Departamento de Sistemas Informáticos y Computación,
This technical report contains the proceedings of the International Workshop on Functional and (Constraint) Logic Programming (WFLP 2003), held in Valencia (Spain) during June 12-13, 2003, at the Federated Conference on Rewriting, Deduction and Programming (RDP 2003). WFLP 2003 is the twelfth in the series of international meetings aimed at bringing together researchers interested in functional programming, (constraint) logic programming, as well as their integration. It promotes the cross-fertilizing exchange of ideas and experiences among researchers and students from the different communities interested in the foundations, applications, and combinations of high-level, declarative programming languages and related areas. Previous WFLP editions have been held in Grado (Italy), Kiel (Germany), Benicàssim (Spain), Grenoble (France), Bad Honef (Germany), Schwarzenberg (Germany), Marburg (Germany), Rattenberg (Germany), and Karlsruhe (Germany).

The Program Committee of WFLP 2003 collected for each paper at least three reviews and held an electronic discussion on all papers during April 2003. Finally, the Program Committee selected 21 regular papers and one system description. In addition to the selected papers, the scientific program included invited lectures by Michael Rusinowitch (LORIA-INRIA-Lorraine, France) and Jan Mahuszyński (Linköping University, Sweden). I would like to thank them for their willingness in accepting our invitation.

I would also like to thank all the members of the Program Committee and all the referees for their careful work in the review and selection process. Many sincere thanks to all authors who submitted papers and to all conference participants. I gratefully acknowledge all the institutions and corporations who have supported this conference. Finally, I express my gratitude to all members of the local Organizing Committee whose work has made the workshop possible.

Table of Contents

Invited Talks

 Automated Analysis of Security Protocols ........................................ 1
  Michael Rusinowitch (LORIA, INRIA - Lorraine)

 On Integrating Rules into the Semantic Web (Abstract) .................... 4
  Jan Maluszynski (Linköping University)

Debugging and Verification I

 Abstract Correction of Functional Programs ................................. 7
  M. Alpuente (U.P. Valencia), D. Ballis (U. Udine), S. Escobar (U.P.
  Valencia), M. Falaschi (U. Udine), and S. Lucas (U.P. Valencia)

 Runtime Verification of Concurrent Haskell (work in progress) .......... 21
  V. Stolz (RWTH Aachen) and F. Huch (CAU Kiel)

Functional Logic Programming I

 A Monadic Semantics for Core Curry ............................................. 33
  A. Tolmach and S. Antoy (Portland State University)

 Improving (Weakly) Outermost-Needed Narrowing: Natural Narrowing 47
  S. Escobar (Universidad Politècnica de Valencia)

 Functional Logic Programming with Failure and Built-in Equality ...... 61
  F. J. Lopez-Fraguas and J. Sanchez-Hernandez (Universidad
  Complutense de Madrid)

Language Design

 Multiple Evaluation Strategies for the Multiparadigm Programming
  Language Brooks ................................................................. 75
  P. Hofstedt and A. Metzner (Technische Universität Berlin)

 Towards Translating Embedded Curry to C (Extended Abstract) ...... 89
  M. Hanus, K. Höppner, and F. Huch (CAU Kiel)

 Towards a Mobile Haskell ....................................................... 103
  A. Rauber Du Bois, P. Trinder (Heriot-Watt University), and H.-W.
  Loidl (Ludwig-Maximilians-Universität München)
Implementation and Transformation

Refined Definitional Trees and Prolog Implementations of Narrowing . . . . 117
P. Julián (Universidad de Castilla–La Mancha)

A Narrowing-based Instantiation Rule for Rewriting-based Fold/Unfold Transformations ............................................. 130
G. Moreno (Universidad de Castilla–La Mancha)

A Memoization Technique for Functional Logic Languages ............. 144
S. España and V. Estruch (Technical University of Valencia)

Constraints

Integrating Finite Domain Constraints and CLP with Sets .......... 158
A. Dal Palù, A. Dovier (Università di Udine), E. Pontelli (New Mexico State University), and G. Rossi (Università di Parma)

Constructive Intensional Negation: a Practical Implementation (extended abstract) .................................................. 172
S. Muñoz, J. Mariño, and J.J. Moreno-Navarro (Universidad Politécnica de Madrid)

Functional Logic Programming II

A Demand Narrowing Calculus with Overlapping Definitional Trees . . 184
R. del Vado Vírseda (Universidad Complutense de Madrid)

Narrowing-based Simulation of Term Rewriting Systems with Extra Variables and its Termination Proof ...................... 198
N. Nishida, M. Sakai, and T. Sakabe (Nagoya University)

A Safe Relational Calculus for Functional Logic Deductive Databases . 212
J.M. Almendros-Jiménez and A. Becerra-Terón (Universidad de Almería)

Debugging and Verification II

Automatic Visualization of Recursion Trees: a Case Study on Generic Programming ....................................................... 227
A. Cunha (Universidade do Minho)

Cost-Sensitive Debugging of Declarative Programs ..................... 241
D. Ballis, M. Falaschi (University of Udine), C. Ferri, J. Hernández-Orallo, M.J. Ramírez-Quintana (U. Politècnica València)

Model Checking Erlang Programs – LTL-Propositions and Abstract Interpretation ............................................................. 255
F. Huch (CAU Kiel)
Applications

An Open System to Support Web-based Learning (Extended Abstract) . 269
M. Hanus and F. Huch (CAU Kiel)

Graphical Representations and Infinite Virtual Worlds in a Logic and
Functional Programming Course ........................................ 283
J.E. Labra Gayo (University of Oviedo)

Handling quantifiers in Relational Data Mining ............................ 295
D. Lorenzo (Univ. Coruña)

A Web Oriented System for Equational Solving ............................ 309
N. Kobayashi (University of Tsukuba), M. Marin (Austrian Academy
of Sciences), and T. Ida (University of Tsukuba)

Author Index ........................................................................ 313
